• Consult all local building codes, as well as city and county ordinances, to ensure that the construction of the Outdoor Shed does not require a building permit. Proper building permit documentation may be required in your neighborhood, and it would be unfortunate to learn this after constructing the Shed.

• Consulte todos los códigos locales de construcción y los reglamentos de la ciudad y el municipio para asegurarse de que la construcción del cobertizo no requiere un permiso de construcción. Puede suceder que en su vecindario se requiera la documentación apropiada de un permiso de construcción, y sería desafortunado enterarse de esto luego de haber construido el cobertizo.

• Consultez tous les codes du bâtiment locaux, ainsi que les décrets des villes et comtés, pour vérifier que la construction de l'abri extérieur n'exige pas un permis de construire. Il est possible que votre quartier exige une documentation visant les permis de construire et il serait dommage d'apprendre cela alors que votre abri est déjà construit.

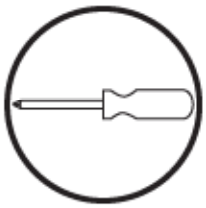
• Consulte todas as normas de construção locais, assim como as posturas camarárias e regulamentos nacionais de forma a assegurar que a construção do Abrigo Exterior não requer nenhuma licença de construção. Poderá ser necessário obter documentação de autorização de construção no seu bairro e seria realmente desagradável descobrir isto depois de montar o seu Abrigo.

• Informieren Sie sich über alle örtlichen baurechtlichen Vorschriften sowie Stadt- und Bezirksverordnungen, um sicherzustellen, dass Sie für den Bau Ihres Lagerschuppens keine Baugenehmigung benötigen. Es könnte sein, dass in Ihrem Wohngebiet entsprechende Dokumentationen für die Baugenehmigung erforderlich sind und es wäre eine Schande, wenn Sie das erst erfahren, nachdem Sie Ihren Lagerschuppen bereits aufgebaut haben.

• Raadpleeg alle plaatselijke bouwcodes en andere voorschriften om u ervan te overtuigen dat u voor het in elkaar zetten van de buitenberging geen bouwvergunning nodig hebt. In uw buurt is hiervoor wellicht een bouwvergunning vereist, en het zou heel jammer zijn om hierachter te komen nadat u uw buitenberging in elkaar hebt gezet.

• 屋外シェッドの建築に建築許可が必要でないことを確認するために、市や自治体の条例に加え、あらゆる地域建築規制を調べてください。適切な建築許可文書が、お客様の地域で必要である場合があります。もし、シェッドを組み立てた後にそれが分かったら残念なことになってしまいます!

• 옥외 간이창고를 설치할 때 건축허가가 필요하지 않으지 시와 카운티의 규정은 물론 모든 로컬 건축 코드도 확인하시기 바랍니다. 귀하의 동네에서 적절한 건축허가 서류를 요구할 수도 있으며, 간이창고가 설치된 후에 알게 되시면 불편을 겪으실 수도 있기 때문입니다.



• You may use a #2 Phillips head screwdriver bit and a power screwdriver or drill, instead of a hand screwdriver. However, be aware that the plastic pieces of your Shed can be damaged by overtightening of screws. To avoid damage we strongly recommend the use of a low-powered power screwdriver or a drill that has an adjustable clutch that is set on a low torque setting. If neither is available, use a hand screwdriver. In any case use caution to avoid overtightening the screws.

• Hay una punta de destornillador Phillips #2 incluida con los elementos del cobertizo. Esta punta puede usarse con cualquier destornillador o taladro eléctrico. Las piezas de plástico de su cobertizo pueden dañarse si se aprietan demasiado los tornillos. Para evitar daños, recomendamos usar un destornillador eléctrico de baja potencia o un taladro que tenga un embrague regulable y pueda colocarse en una posición de baja velocidad. Si no dispone de ninguna de estas herramientas, use un destornillador manual. En todos los casos, cuide de no apretar demasiado los tornillos.

• Les accessoires fournis avec un abri comprennent un tournevis à embout Phillips N° 2. Cet embout peut être utilisée avec tout tournevis ou perceuse électrique. Les sections en plastique de l'abri risquent d'être endommagées si les vis sont trop serrées. Pour éviter ceci, nous recommandons fermement d'utiliser un tournevis ou perceuse électriques de faible puissance, à embrayage réglable réglé sur faible couple. Si ces outils ne sont pas disponibles, utilisez un tournevis manuel. Dans tous les cas, évitez de trop serrer les vis.

• Pode utilizar uma broca tipo Phillips n.° 2 e uma chave de fendas automática ou um berbequim em vez de uma chave de fendas manual. Contudo, tenha atenção em relação às peças de plástico do seu Abrigo que podem ser danificadas se apertar os parafusos em excesso. Para evitar este tipo de problemas, recomendamos a utilização de uma chave de fendas automática de baixa rotação ou um berbequim com uma patilha ajustável para poder obter um binário reduzido. Se não tiver nenhuma destas ferramentas disponíveis, utilize uma chave de fendas manual. Em qualquer dos casos, tenha extremo cuidado para evitar apertar os parafusos em demasia.

• Sie dürfen anstelle eines Handschraubenziehers auch einen Nr. 2 Kreuzschraubenziehereinsatz und einen elektrischen Schraubenzieher oder eine Bohrmaschine benutzen. Beachten Sie aber bitte, dass die Plastikteile Ihres Schuppens beschädigt werden können, wenn Sie die Schrauben zu fest anziehen. Um solche Schäden zu verhindern, empfehlen wir, dass Sie einen elektrischen Schraubenzieher mit geringer Leistung oder eine Bohrmaschine mit einer einstellbaren Kupplung und einer niedrigen Drehmomenteinstellung verwenden. Falls Sie diese Geräte nicht zur Hand haben, können Sie einen Handschraubenzieher benutzen. Verfahren Sie in jedem Fall mit Vorsicht, um die Schrauben nicht zu fest anzuziehen.

• In plaats van een handmatige schroevendraaier kunt u een kruiskopschroevendraaierbit nr. 2 en elektrische schroevendraaier of boor gebruiken. Wees er echter op attent dat de plastic onderdelen van de berging beschadigd kunnen raken als de schroeven te strak worden aangedraaid. Om beschadiging te vermijden, raden wij u sterk aan een niet al te sterke elektrische schroevendraaier te gebruiken of een boor met verstelbare koppeling, en deze op een lager toerental in te stellen. Mocht u geen van beide ter beschikking hebben, gebruik dan een gewone handmatige schroevendraaier. Wees hoe dan ook altijd voorzichtig dat u de schroeven niet te strak aandraait.

• 手動のドライバーの代わりに、#2プラスドライバー・ビットと電動ドライバーまたはドリルを使用することができます。ただし、お客様のシェッドのプラスチック部分がネジの締め過ぎにより損傷する可能性があることを覚えておいてください。この損傷を避けるために、低出力電動ドライバーまたは低トルクに設定された調整可能なクラッチ付きのドリルを使用されることを強くお勧めします。どちらもお持ちでない場合は、手動のドライバーを使用してください。いずれにせよ、ネジの締め過ぎを避けるために、注意してください。

• 일반 스크루 드라이버 대신에 #2 필립스 헤드 스크루 드라이버 비트를 사용하셔도 됩니다. 하지만 간이창고의 플라스틱 부위는 스크루를 너무 세게 조이면 손상될 수도 있으니 주의하시기 바랍니다. 그러한 손상을 방지하기 위해서 출력이 낮은 파워 스크루 드라이버 또는 낮은 토크로 설정이 된 조정이 가능한 클러치가 장착된 드릴의 사용을 강력히 추천합니다. 다른 것들이 준비되어 있지 않으면 일반 스크루 드라이버를 사용하십시오. 어떠한 경우에도 스크루를 너무 세게 조이지 마십시오.

• Surface must be leveled before installation. We recommend building a level work space with a concrete or patio style surface. If the surface is not properly leveled, the Outdoor Shed will not assemble correctly. Proper surface leveling will save you time in the long run, so please do not ignore this step.

• La superficie debe estar nivelada antes de comenzar el armado. Recomendamos preparar un espacio de trabajo nivelado con una superficie de concreto o de tipo patio. Si la superficie no está nivelada de manera adecuada, el cobertizo para exteriores no podrá armarse correctamente. La nivelación de la superficie le ahorrará tiempo de trabajo, por lo tanto, le pedimos que no ignore este paso.

• La surface d'installation doit être de niveau. Nous recommandons de construire un espace de travail de niveau en béton ou de genre patio. Si la surface n'est pas correctement de niveau, l'assemblage de l'abri extérieur ne se fera pas correctement. Vous gagnerez du temps sur le long terme grâce à une surface bien de niveau, ne négligez donc pas cette étape.

• A superfície deverá ser nivelada antes da instalação. Recomendamos a construção de um espaço de trabalho nivelado com uma superfície em betão ou tipo pátio. Caso a superfície não seja bem nivelada, o Abrigo Exterior não ficará corretamente montado. O nivelamento de superfície adequado poupar-lhe-á tempo a longo prazo, pelo que não deverá ignorar este passo.

• Der Untergrund muss vor Beginn der Montagearbeiten eingeebnet werden. Wir empfehlen, dass Sie einen ebenerdigen Arbeitsplatz schaffen, der über eine Zement- oder Terrassenoberfläche verfügt. Wenn die Oberfläche vorab nicht korrekt geebnet wird, lässt sich der Lagerschuppen nicht korrekt zusammenbauen. Das sorgfältige Ebnen der Arbeitsoberfläche spart Ihnen langfristig gesehen Zeit. Bitte ignorieren Sie diesen Schritt daher nicht.

• Voordat de berging in elkaar wordt gezet, moet het oppervlak waterpas worden gemaakt. Een waterpas staande werkplek met een oppervlak van beton, zoals een patio, verdient de voorkeur. Als het werkoppervlak niet waterpas staat, resulteert dit in problemen tijdens het in elkaar zetten van de buitenberging. Het waterpas maken van het werkoppervlak zal u op lange termijn tijd besparen, dus deze stap moet niet worden overgeslagen.

• 設置前に、設置面を水平にしておく必要があります。コンクリートまたはパティオ形式の設置面を使用して水平な作業場を構築することを推奨します。設置面が正しく水平に調整されていなければ、屋外シェッドを正しく組み立てることができません。設置面を水平に調整することが、長い目で見て時間を節約することになりますので、このステップを無視しないでください。

• 설치하기 전에 표면을 평탄하게 만들어야 합니다. 콘크리트 또는 패티오 스타일의 표면에 평탄한 공간을 만드시기를 권해 드립니다. 만일 표면이 충분히 평탄하지 않으면 이 간이창고는 제대로 조립되지 않을 것입니다. 충분한 표면 정지작업은 장기적으로 시간을 절약할 수 있으니 이 절차를 무시하지 마십시오.

• If you plan on anchoring your shed, you must purchase the correct anchoring hardware for the type of platform chosen: concrete, wood, or road base. The anchoring hardware used depends on the platform. If you have a concrete platform, we recommend using a hammer drill, 5/16" (7,9 mm) masonry bit, four (4) 3/8" x 2" (9,5 mm x 5,1 cm) Concrete Screws and four (4) 3/8" x 1" (9,5 mm x (2,54 cm) Fender Washers. If you have a wood-framed platform, we recommend using a drill, 5/16" (7,9 mm) drill bit, four (4) 3/8" x 1 1/2" (9,5 mm x 3,81 cm) Lag Screws and four (4) 3/8" x 1" (9,5 mm x 2,54 cm) Fender Washers. **Do not exceed a 3/8" diameter screw. Refer to your local hardware store for this hardware.**

• Si piensa anclar su cobertizo, es necesario comprar los elementos de anclaje correctos para el tipo de plataforma escogido: concreto, madera, o base granular. Los elementos de anclaje usados dependen de la plataforma. Si tiene una plataforma hecho de concreto, recomendamos que use un martillo perforador, broca de albañilería de 7,9 mm (5/16"), cuatro (4) Tornillos de anclaje para concreto de 9,5 mm x 5,1 cm (3/8" x 2") y cuatro (4) Rondanas de protección de 9,5 mm x 2,54 cm (3/8" x 1"). Si tiene una plataforma hecho de madera, recomendamos que use un taladro eléctrico, una broca de 7,9 mm (5/16"), cuatro (4) Tornillos para madera de 9,5 mm x 3,81 cm (3/8" x 1 1/2") y cuatro (4) Rondanas de protección de 9,5 mm x 2,54 cm (3/8" x 1"). **No exceda un diámetro de 9,5 mm (3/8"). Refiérase a su ferretería local para obtener estos elementos.**

• Si vous projetez d'ancrer votre abri, il faut acheter les accessoires d'ancrage corrects pour le type de plate-forme que vous avez choisi : béton, bois, ou enrobé de base. Les accessoires d'ancrage utilisés dépendent de la plate-forme. Si vous avez construit une plate-forme en béton, nous recommandons que vous utilisiez un perceuse de percussion, un foret à maçonnerie de 7,9 mm (5/16"), quatre (4) Vis d'ancrage à béton de 9,5mm x 5,1 cm (3/8" x 2") et quatre (4) Rondelles de protection de 9,5mm x 2,54cm (3/8" x 1"). Si vous avez construit une plate-forme en bois, nous recommandons que vous utilisiez une perceuse électrique, un foret de 7,9 mm (5/16"), quatre (4) Vis de retard de 9,5mm x 3,81 cm (3/8" x 1 1/2") et quatre (4) Rondelles de protection de 9,5mm x 2,54cm (3/8" x 1")). **Ne dépassez pas un diamètre de 9,5mm (3/8"). Votre quincaillerie du coin aura ces accessoires.**

• Se pretende ancorar o seu alpendre, deve comprar o material de ancoragem correcto para o tipo de plataforma escolhida: betão, madeira ou base de pavimento. O material de ancoragem utilizado depende da plataforma. Se tiver uma plataforma de betão, recomendamos a utilização de um martelo perfurador, 5/16" (7,9 mm) broca de alvenaria, quatro parafusos para betão (4) 3/8" x 2" (9,5 mm x 5,1 cm) e quatro anilhas (4) 3/8" x 1" (9,5 mm x (2,54 cm). Se tiver uma plataforma de estrutura de madeira, recomendamos a utilização de um berbequim, 5/16" (7,9 mm) broca, quatro parafusos para madeira 3/8" x 1 1/2" (9,5 mm x 3,81 cm) e quatro anilhas (4) 3/8" x 1" (9,5 mm x 2,54 cm). **Não use parafusos com diâmetro superior a 3/8". Consulte a sua loja de ferragens local para obter este material.**

• Wenn Sie Ihren Schuppen verankern möchten, müssen Sie die richtigen Verankerungswerkzeuge und Eisenwaren für den gewählten Plattformtyp kaufen: Beton, Holz oder Straßenbelag. Die zu verwendenden Verankerungswerkzeuge und Eisenwaren richten sich nach der Plattform. Wenn Sie eine Betonplattform haben, empfehlen wir: Bohrhammer, 7,9 mm (5/16 Zoll) Steinbohrereinsatz, vier (4) 9,5 mm x 5,1 cm (3/8 Zoll x 2 Zoll) Betonschrauben und vier (4) 9,5 mm x 2,54 cm (3/8 Zoll x 1 Zoll) Unterlegscheibe zum Sichern. Wenn Sie eine Holzrahmenplattform haben, empfehlen wir: Bohrer, 7,9 mm (5/16 Zoll) Bohrereinsatz, vier (4) 9,5 mm x 3,81 cm (3/8 Zoll x 1 1/2 Zoll) Ankerschrauben und vier (4) 9,5 mm x 2,54 cm (3/8 Zoll x 1 Zoll) Unterlegscheiben zum Sichern. **Der Schraubendurchmesser von 9,5 mm (3/8 Zoll) darf nicht überschritten werden! Erkundigen Sie sich in Ihrem örtlichen Heimwerkergeschäft nach diesen Eisenwaren.**

• Als u van plan bent uw schuur te verankeren, moet u de juiste verankeringsmiddelen kopen voor het door u gekozen platform: beton, hout of grof-aggregaatmengsel (wegfundering). De gebruikte verankeringsmiddelen zijn afhankelijk van het platform. Bij een betonnen platform raden wij het gebruik van een klopboor, een 7,9 mm (5/16") steenboortje, vier (4) 9,5 mm x 5,1 cm (3/8" x 2") betonbouten en vier (4) 9,5 mm x 2,54 cm (3/8" x 1") onderlegringen aan. Bij een platform bestaande uit een houten frame raden wij het gebruik van een boor, een 7,9 mm (5/16") houtboortje, vier (4) 9,5 mm x 3,81 cm (3/8" x 1 1/2") houtschroeven en vier (4) 9,5 mm x 2,54 cm (3/8" x 1") onderlegringen aan. **Gebruik geen bouten c.q. schroeven met een diameter van meer dan 9,5 mm (3/8"). **⚠ 警告**
シェッドにアンカーを付けない場合は、物的損害や身体傷害が生じる可能性があります。

• Sharp objects may damage your floor. If resting sharp, heavy objects on your Shed floor, place a block of wood between the sharp object and floor.

• Los objetos afilados pueden dañar su piso. Si debe apoyar objetos puntiagudos y de mucho peso sobre el piso de su cobertizo, coloque un pedazo de madera entre el objeto puntiagudo y el piso.

• Les objets pointus risquent d'endommager votre plancher. Lors de la pose d'objets lourds et pointus sur le plancher de l'abri, placez un bloc de bois entre le plancher et l'objet.

• Os objetos afiados podem danificar o seu soalho. Caso coloque objetos pesados e afiados no soalho do seu Abrigo, coloque um bloco de madeira entre o objeto em causa e o soalho.

• Spitze Gegenstände können Ihren Fußboden beschädigen. Wenn Sie spitze, schwere Gegenstände auf den Boden des Schuppens legen, legen Sie einen Holzklotz zwischen den Fußboden und den spitzen Gegenstand.

• Scherpe voorwerpen kunnen uw vloer beschadigen. Als u scherpe, zware voorwerpen op de vloer van de berging neerlegt, plaats er dan een houten blok tussen.

• 尖った物質は床を損傷することがあります。尖った重いものをシェッドの床に置く場合は、尖った物質と床の間に木材を挟んでください。

• 날카로운 물체가 바닥에 손상을 입힐 수도 있습니다. 날카롭고 무거운 물체를 간이창고 바닥 위에 올려 놓을 때는 나무 조각을 날카로운 물체와 바닥 사이에 받쳐 놓으십시오.

• You must provide a platform on which to assemble your new shed. These instructions explain how to build three types of platforms: **Concrete[1]**, **Wood[2]**, or **Road base-filled wood frame[3]**. Of these three types of platforms, we highly recommend a concrete platform, second a wood-framed platform, and finally a road base-filled wood frame. **The platform you choose must be built above ground in order to avoid water pooling inside the shed. All lumber must be rated for outdoor use!**

• Es preciso construir una plataforma sobre la cual usted debe ensamblar su nuevo cobertizo. Estas instrucciones explican cómo construir tres tipos de plataformas: **Concreto[1]**, **Madera[2]**, o un **Armazón de madera lleno de base granular[3]**. De estos tres tipos de plataformas, nosotros recomendamos sin reserva que construya una plataforma de concreto. También se puede construir un armazón hecho de madera o un armazón hecho de madera y lleno de base granular. **La plataforma debe ser construida arriba del suelo para evitar el aflujo de agua dentro del cobertizo. ¡Toda la madera debe estar clasificada para el uso externo!**

• Il faut construire une plate-forme sur laquelle vous devez assembler votre nouvel abri. Ces instructions expliquent comment construire trois types de plate-formes : **Béton[1]**, **Bois[2]**, ou **Charpente en bois remplie avec enrobé de base[3]**. De ces trois types de plate-formes, nous recommandons premièrement que vous construisiez une plate-forme en béton, secondement une Charpente en bois, et troisièmement une Charpente en bois remplie avec enrobé de base. **La plate-forme que vous choisissez doit être construite au-dessus du sol afin d'éviter l'accumulation d'eau à l'intérieur de l'abri. Tous le bois d'oeuvre doit être approuvé pour l'usage à l'extérieur !**

• Deve preparar uma plataforma sobre a qual montar o seu novo alpendre. Estas instruções explicam como montar estes três tipos de plataformas: **Betão[1]**, **Madeira[2]** ou **Estrutura de madeira cheia com base de pavimento[3]**. Destes três tipos de plataformas, recomendamos vivamente uma plataforma de betão, em segundo uma plataforma de estrutura de madeira e finalmente a estrutura de madeira cheia com base de pavimento. **A plataforma que escolhe deve ser construída acima do solo para evitar a acumulação de poças de água no interior do alpendre. Toda a madeira deve ser adequada para a utilização exterior!**

• Sie müssen eine Plattform bereitstellen, auf der Sie Ihren Schuppen errichten. Diese Anleitungen erläutern den Bau von drei verschiedenen Plattformtypen: **Beton[1]**, **Holz[2]**, oder mit **Straßenbelag gefüllter Holzrahmen[3]**. Von diesen drei Plattformtypen empfehlen wir zuerst eine Betonplattform, zweitens eine Holzrahmenplattform und schließlich einen mit Straßenbelag gefüllten Holzrahmen. **Die von Ihnen gewählte Plattform muss oberirdisch gebaut werden, um das Ansammeln von Wasser im Schuppen zu verhindern. Alle verwendeten Holzteile müssen für die Verwendung im Freien geeignet sein!**

• U moet zorgen voor een platform waarop u uw nieuwe schuur opbouwt. Deze instructies leggen uit hoe u drie soorten platforms kunt bouwen: **beton[1]**, **hout[2]** of **hout gevuld met grof-aggregaatmengsel[3]**. Van deze drie soorten platforms kunt u het beste eerst een betonnen platform kiezen, daarna een platform bestaande uit een houten frame en als laatste een met grof-aggregaatmengsel gevuld houten frame. **Het door u gekozen platform moet bovengronds worden gebouwd om ophoping van water in de schuur te voorkomen. Al het gebruikte hout moet voor buiten geschikt zijn!**

• 新しい小屋の組み立てには台が必要です。この説明書には次の3つのタイプの台の作り方を説明します。**コンクリート[1]**、**木材[2]**、**木枠付き道路基盤[3]**。これら3種の台の内、最もお勧めするのはコンクリートの台、2番目は木材の台、最後は木枠付き道路基盤です。**選択した台は地面よりも高く作り、小屋の中に水がたまらないようにしてください。使用する木材は全て屋外用のものにしてください。**

• ㄱ 귀하의 새로운 간이창고를 설치하기 위한 플랫폼이 필요합니다. 세 가지 종류의 플랫폼을 설치하는 방법에 관한 설명입니다: 콘크리트(1), 목재(2) 또는 도로 바닥으로 채워진 목재 프레임(3). 이들 세 종류의 플랫폼 중에서 콘크리트 플랫폼을 우선적으로 추천하며, 두 번째로는 목재 프레임 플랫폼, 그리고 마지막으로 도로 바닥으로 채운 목재 프레임 순입니다. 선택하신 플랫폼은 반드시 지상 위에 설치되어야 간이창고 안으로의 침수를 피할 수 있습니다. 사용되는 목재는 모두 옥외용이어야 합니다!

• If more than six (6) inches of snow accumulate on the roof of the shed, carefully remove the snow to avoid possible roof collapse. While standing on the ground, remove the snow from the roof with a broom or snow shovel. Do not stand on the roof to remove snow.

• Si acumula más de 15,24 cm de nieve sobre el techo del cobertizo, quítela cuidadosamente para evitar cualquier derrumbe del techo. Párese en el suelo y retire la nieve del techo con una escoba o pala. ¡No se pare en el techo para quitar la nieve!

• Si plus de 15,24 cm de neige accumulent sur le toit de l'abri, enlevez-la soigneusement pour éviter un possible effondrement du toit. Pendant que vous vous mettez sur la terre, enlevez la neige du toit avec un balai ou une pelle. Ne vous mettez-vous sur le toit pour enlever la neige.

• Caso verifique a acumulação de 15 cm (6 polegadas) de neve no telhado do seu abrigo, retire a neve cuidadosamente para evitar um possível colapso do telhado. Mantendo-se sobre o solo, retire a neve do telhado com uma vassoura ou pá. Não se coloque sobre o telhado para retirar a neve.

• Falls sich über sechs (6) Zoll Schnee auf dem Dach Ihres Schuppens ansammeln sollten, entfernen Sie den Schnee bitte vorsichtig, um ein mögliches Einstürzen des Dachs zu vermeiden. Entfernen Sie den Schnee mit einem Besen oder einer Schneeschaufel vom Dach, wobei Sie auf dem Boden stehen. Stellen Sie sich nicht auf das Dach, um den Schnee zu entfernen.

• Als er zich op het dak van de berging meer dan 15 cm sneeuw ophoopt, dient u de sneeuw voorzichtig te verwijderen om instorting van het dak te voorkomen. Hierbij dient u op de grond te staan en de sneeuw met een bezem of sneeuwschep van het dak te verwijderen. Verwijder de sneeuw nooit terwijl u op het dak staat.

• 6インチを超える雪がシェッドの屋根の上に積もった場合、屋根崩壊を回避するために、慎重に雪を除去してください。地面に立ったまま、ホウキまたは除雪用シャベルを使用して屋根から雪を除去してください。除雪するために屋根の上に上がらないでください。

• 만일 육(6) 인치 이상의 눈이 간이창고의 지붕 위에 쌓이면 붕괴를 막기 위해 조심스럽게 눈을 치워야 합니다. 지상에서 빗자루 또는 제설삽으로 지붕의 눈을 치우십시오. 눈을 치우기 위해 지붕 위에 올라가지 마십시오.

## CLEANING & CARE

**Congratulations on your Lifetime® product purchase. By following the instructions below, your new Lifetime product should provide you with years of service and enjoyment.**
The polyethylene panels are stain- and solvent-resistant. Most stains can be removed, using a mild soap and a soft-bristled brush. Abrasive cleaning materials may scratch the plastic and are not recommended. Repair scratches or rust spots on the metal by sanding the affected area lightly; using a rust preventative spray primer; and finally, spraying with a high-gloss spray enamel paint. Avoid placing a direct heat source on or near surfaces unless using a heat barrier.

## LIMPIEZA Y CUIDADO

**Felicidades por la compra de su producto Lifetime®. Si cumple todas las instrucciones siguientes, podrá disfrutar satisfactoriamente del servicio de su nuevo producto Lifetime.**
Las paredes y los estantes de polietileno son resistentes a las manchas y al solvente. Use para su limpieza un jabón suave y un cepillo de cerdas blandas. Los materiales limpiadores abrasivos podrían raspar el plástico y no son recomendables. Repare las raspaduras o zonas oxidadas de las piezas de metal lijando ligeramente el área afectada; aplique luego una impresión en aerosol para prevenir la formación de óxido; finalmente pinte con un esmalte brillante en aerosol. Evite colocar una fuente directa de calor sobre las superficies o cerca de ellas a menos que use una barrera contra el calor.

## NETTOYAGE ET ENTRETIEN

**Nous vous félicitons d'avoir acheté ce produit Lifetime®. En suivant les instructions ci-dessous, votre nouvel produit Lifetime devrait vous fournir des années de service et de plaisir.**
Les murs et les étagères en polyéthylène sont résistants aux tâches et solvants de nettoyage. Pour les nettoyer, servez-vous d'un savon doux et d'une brosse douce. Les produits abrasifs de nettoyage risquent d'égratigner le plastique et ne sont pas recommandés. Pour réparer les égratignures ou tâches de rouille sur le métal, frottez légèrement l'endroit affecté ou papier de verre, puis passez un couche de produit vaporisant préventif et enfin vaporisez une peinture émail brillant élevé. Évitez de placer une source de chaleur directe sur ou près des surfaces, ou protégez-les à l'aide d'une protection contre la chaleur.

## LIMPEZA E CUIDADOS A TER

**Parabéns por ter adquirido o seu produto Lifetime®. Ao seguir as instruções abaixo, o seu novo produto Lifetime oferecer-lhe-á anos de serviço e usufruto.**
Os painéis de polietileno são resistentes às manchas e solventes. A maioria das manchas pode ser removida através da aplicação de um produto de limpeza não abrasivo com uma escova de cerda suave. Os materiais de limpeza abrasivos podem riscar o plástico, pelo que não são recomendados. Repare os riscos ou manchas de ferrugem no metal lixando ligeiramente a área afetada; utilize um primário em spray para a prevenção da ferrugem e, finalmente, aplique uma tinta de esmalte em spray de brilho elevado. Evite aplicar qualquer fonte de calor direta sobre ou na proximidade das superfícies, exceto se utilizar uma barreira de calor.

## REINIGUNG UND PFLEGE

**Wir gratulieren Ihnen zum Erwerb Ihres Lifetime® Produkt. Wenn Sie die nachstehenden Anleitungen befolgen, wird Ihnen Ihr Lifetime-Produkt viele Jahre dienen und Ihnen Freude bereiten.**
Die Polyethylenwände und Regale sind schmutzabweisend und lösungsmittelbeständig. Die meisten Flecken können mit einem milden Reinigungsmittel und einer weichborstigen Bürste entfernt werden. Scheuermittel und Topfschwämme werden nicht empfohlen, da sie die Plastikteile zerkratzen können. Kratzer oder Rostflecken am Metall können entfernt werden, indem man den betroffenen Bereich leicht abschleift, ein Rostschutzgrundierungsmittel aufträgt und die Fläche zum Schluss mit einem Hochglanzlack besprüht. Stellen Sie keine direkte Hitzequelle auf oder neben die Oberflächen, wenn Sie keine Wärmesperre benutzen.

## REINIGING & VERZORGING

**Hartelijk gefeliciteerd met uw aankoop van een Lifetime® product. Als u de volgende aanwijzingen opvolgt, zal uw nieuwe Lifetime product jarenlang mee kunnen.**
De wanden en planken van polyethyleen zijn bestendig tegen vlekken en oplosmiddelen. De meeste vlekken kunnen worden verwijderd met een milde soort zeep en een zachte borstel. Schurende reinigingsmaterialen kunnen het plastic krassen en worden niet aanbevolen. U kunt krassen of roestvlekken op het metaal repareren door het betreffende deel licht te schuren, een roestwerende spuitgrondverf aan te brengen en tenslotte een laagje hoogglansspuitlak aan te brengen. Plaats geen directe hittebronnen op of in de omgeving van oppervlakken, tenzij er een hittebarrière wordt gebruikt.

## 掃除とお手入れ

**Lifetime® アウトドア・シェッドをご購入いただきありがとうございます。以下の指示に従うことで、お客様の新しいLifetimeシェッド製品を長年にわたってご使用およびご活用いただけます。**
ポリエチレン製の壁と棚は、耐汚染性および耐溶剤性となっております。ほとんどの汚れは、中性洗剤および毛先のやわらかいブラシを使用して取り除くことができます。研磨用の洗剤やブラシの使用は、プラスチックに傷をつける可能性があるため推奨しません。金属の傷や錆の部分は、該当部分に軽くサンドペーパーをかけることで修繕できます。そのとき、さび防止用スプレープライマーを使用してください。最後に、高光沢のスプレー式エナメルペイントを使用して仕上げます。熱障壁を使用していない限り、表面または表面近くに直接の熱源を置かないようにしてください。

## 청소 및 손질

**Lifetime 제품의 구입을 축하 드립니다. 다음의 지침을 참조하시면 귀하의 새로운 Lifetime 제품은 앞으로 여러 해 동안 서비스와 즐거움을 귀하께 선사할 것입니다.**
폴리에틸렌 패널은 때와 솔벤트에 내성 을 갖고 있습니다. 약한 비누와 부드러운 솔을 사용하면 대부분의 때를 제거할 수 있습니다. 연마용 세척제는 플라스틱에 상처를 낼 수 있으므로 추천되지 않습니다. 스크래치 또는 금속의 녹슨 곳은 가볍게 샌드페이퍼로 긁어 내십시오; 녹 방지용 스프레이 프라이머를 사용하고; 마지막으로 고광택 에나멜 페인트를 분사하십시오. 열 차단막을 설치하지 않는 한은 열이 있는 곳이나 근처에는 설치하지 마십시오.

## 清潔與維護

**祝賀您購買了Lifetime® 產品。請按照下述步驟護理您的全新Lifetime® 產品，使它們持久耐用，並給您帶來無盡的快樂。**
**嵌板具有防汙和耐溶劑性。大多數的污漬可用溫和的潔手液和軟刷清潔乾淨。磨蝕性的清潔品可能刮壞塑膠表面，因此不建議使用。金屬表面的刮痕或鏽跡可通過輕輕研磨、噴上防銹底漆、最後噴上高光澤瓷漆便可修復。除非使用了隔熱材料/產品，否則不要在本產品表面上或表面附近置放直接熱源。**
